

# Dongeng Kedadeyane Bledheg: Si Sorot kang Gumbleger

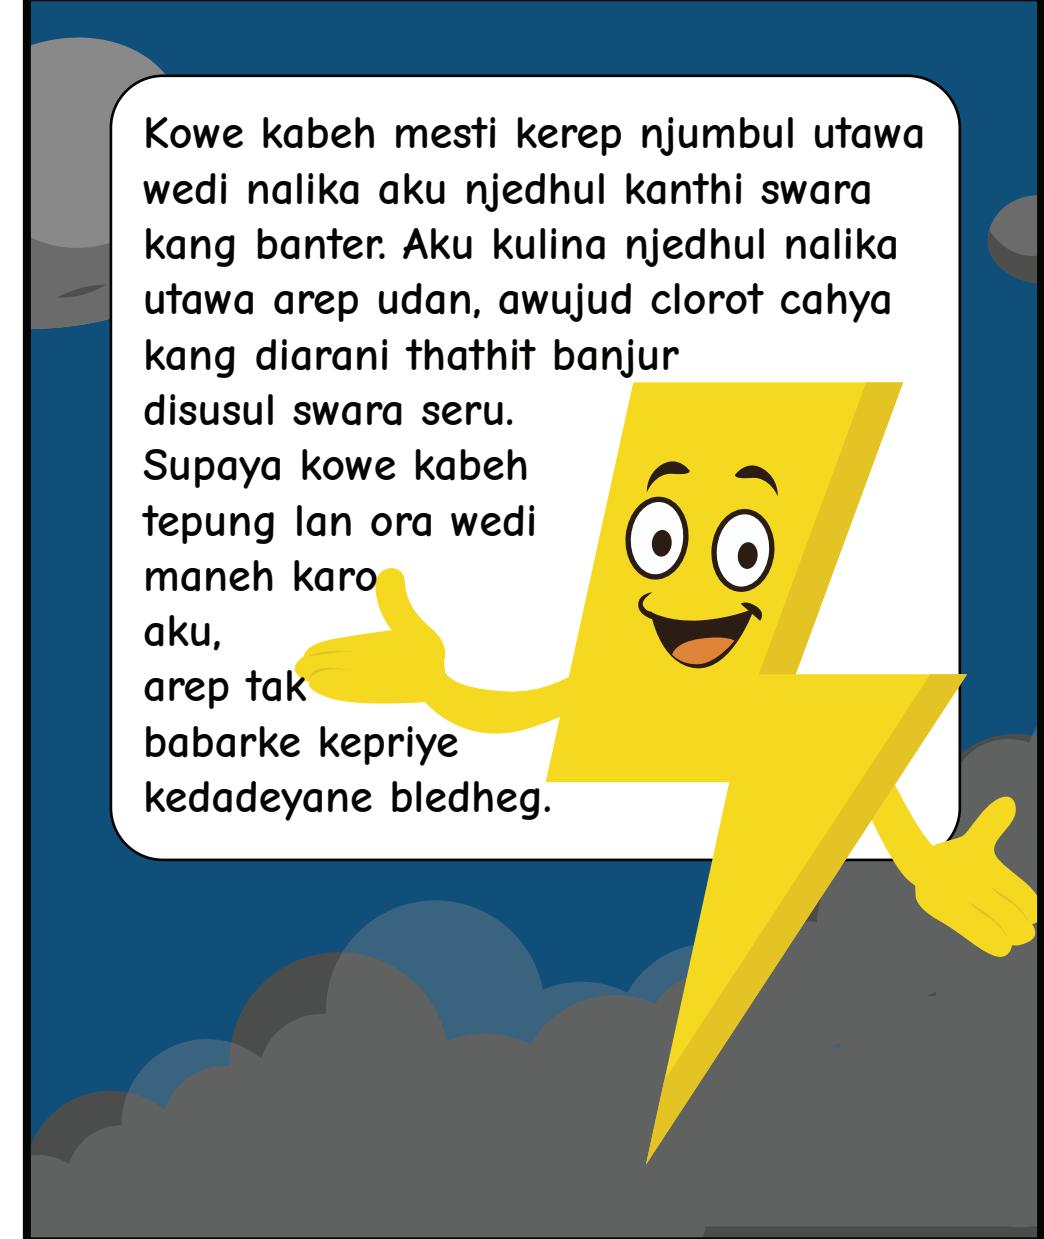

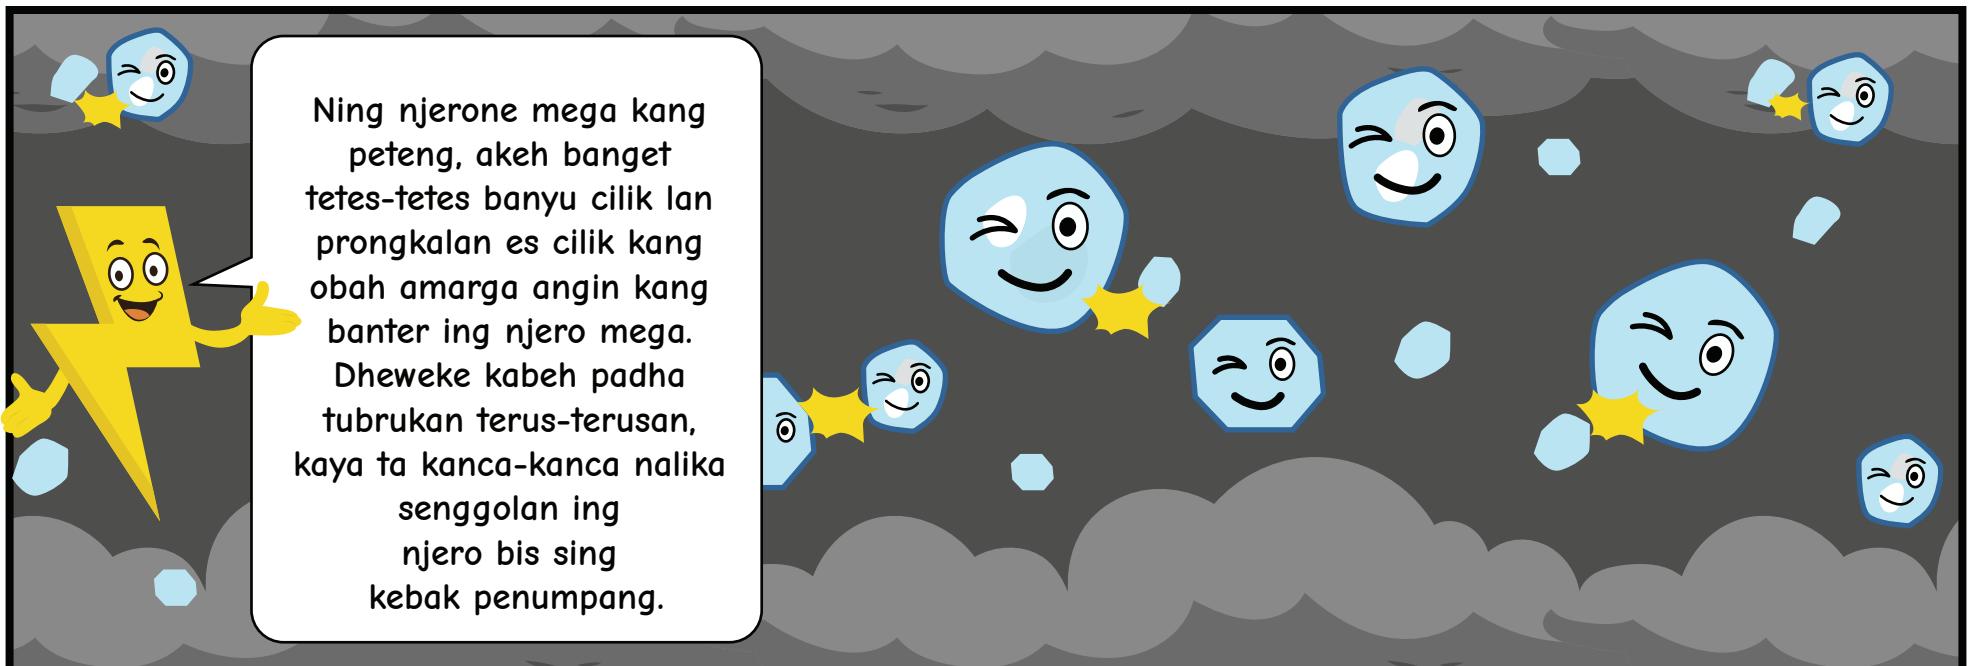

Ing selane mega kandel kang warna klawu, katon anak thathit kang lagi nyawang bumi.

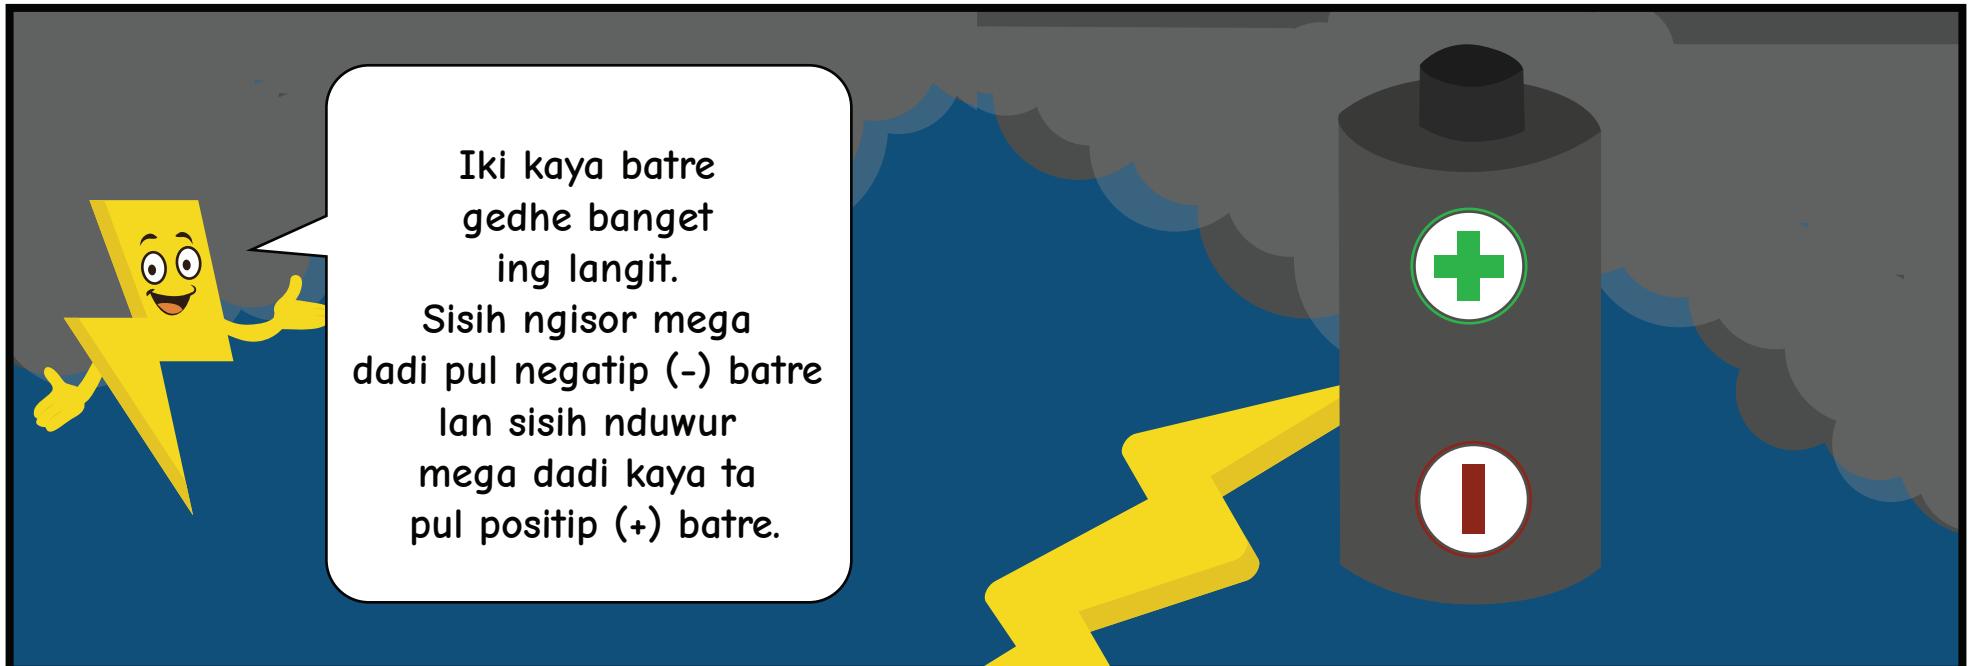

Kewe kabeh mesti kerep njumbul utawa wedi nalika aku njedhul kanthi swara kang banter. Aku kulina njedhul nalika utawa arep udan, awujud clorot cahya kang diarani thathit banjur disusul swara seru. Supaya kewe kabeh tepung lan ora wedi maneh karo aku, arep tak babarke kepriye kedadeyane bledheg.

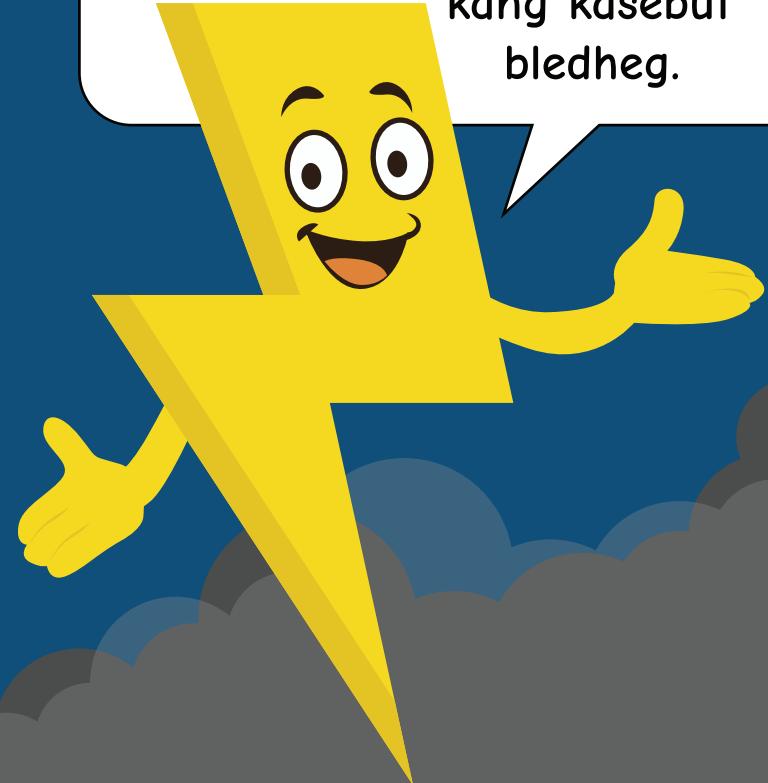

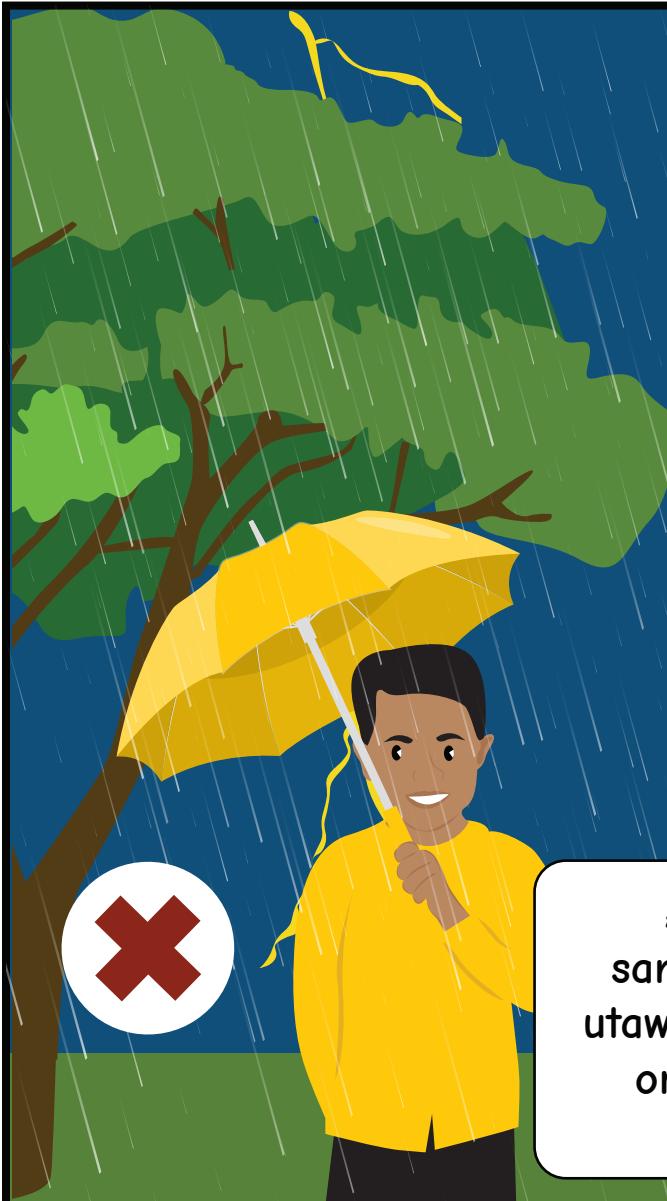

Dene, ing ngisor mega, ing lemah, kabeh piranti uga nduwéni kekuatan listrik positif (+) senadyan sithik. Nah, kekuatan negatif ing ngisor mega dadi kasengsem karo energi positif ing lemah.

Angin ing sakiwa tengene dalan  
thathit iki malih dadi panas banget.  
banjur, angin kang panas iki saya  
gedhe lan tabrakan maneh kanthi  
cepet lan ngetokake swara banter  
kang kasebut  
bledheg.

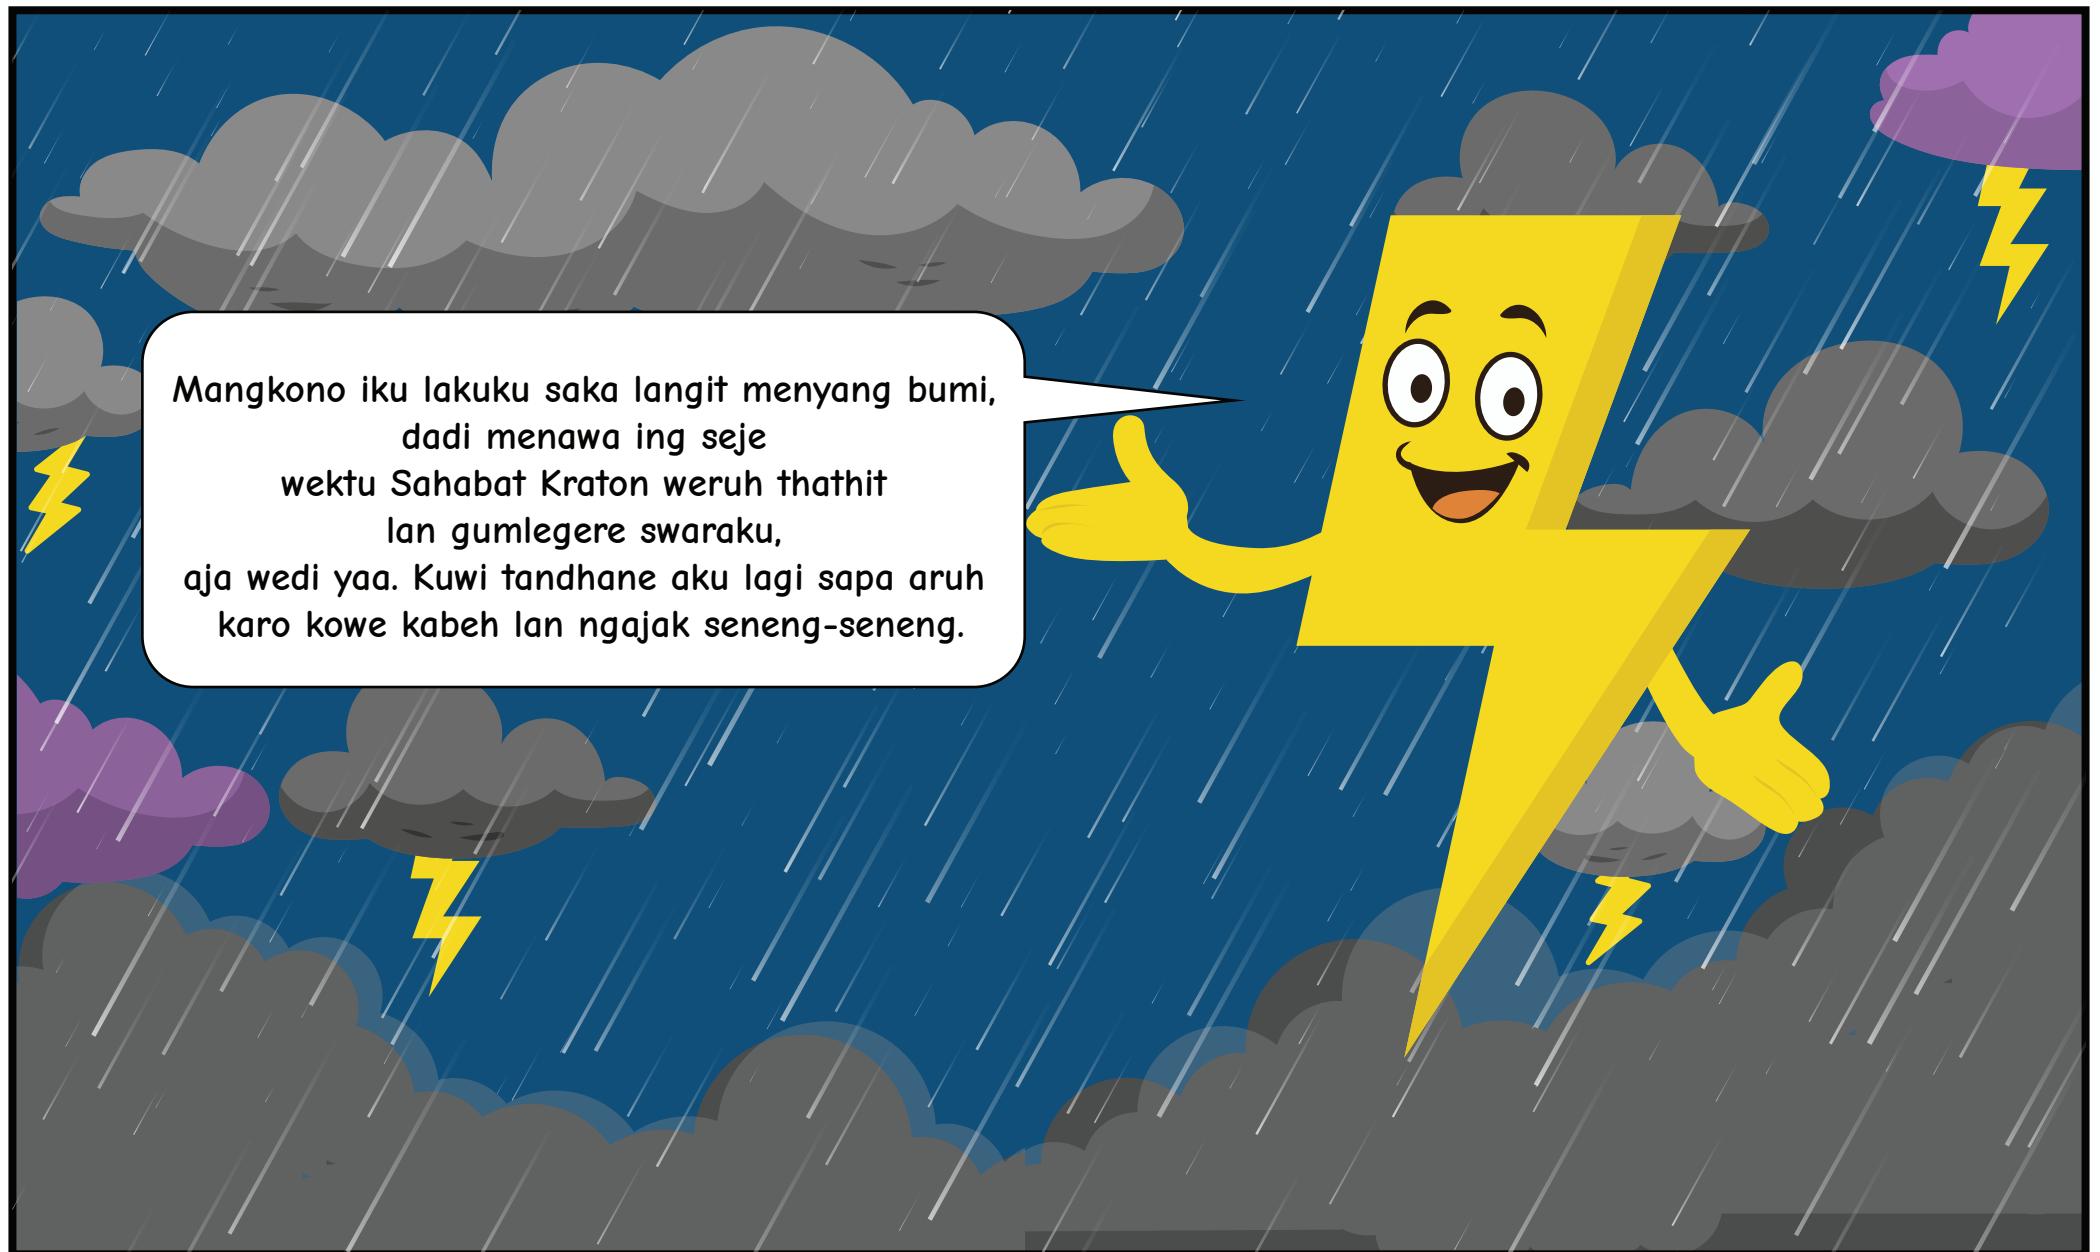

Nah, iki kabeh tuladhane supaya Sahabat Kraton aman saka bledheg.

Aja nganggo piranti  
elektronik,  
kaya ta tilpon  
kang nyambung  
listrik.

Mangkono iku lakuku saka langit menyang bumi,  
dadi menawa ing seje  
wektu Sahabat Kraton weruh thathit  
lan gumlegere swaraku,  
aja wedi yaa. Kuwi tandhane aku lagi sapa aruh  
karo kowe kabeh lan ngajak seneng-seneng.
